T&DI's Planning and Development (P&D) Council is charged with gathering, reviewing, developing, evaluating, and disseminating new criteria, research, and technologies in the areas of multimodal transportation planning, land use, and development.

The multidisciplinary P&D Council liaises with a diverse set of transportation stakeholders from public and private sector practitioners and academia to identify a comprehensive set of emerging transportation advancements and needs for research and standards development.

**Economics & Finance Committee (EFC)**
Develop, evaluate, and disseminate knowledge on the economic and financial aspects of all phases of transportation infrastructure development, from planning to retirement.

**Freight & Logistics Committee (FLC)**
Identify, evaluate, and disseminate advances in research and practice in the area of freight systems and freight infrastructure engineering and management.

**Infrastructure Systems Committee (ISC)**
Study, evaluate, and report on current practices and promote new developments in the science of infrastructure management.

**Sustainable Transportation Committee (STC)**
Develop and disseminate information and knowledge pertaining to improving the sustainability of transportation and urban development.

Note: Committees hold bi-annual in-person meetings during TRB and ICTD. Meetings are held by conferencing platforms throughout the year and are scheduled based on need.

**COMMITTEE OVERVIEW & ACTIVITIES**

The council’s committee activities and initiatives are wide ranging, a few highlights are listed below:

- Developing ASCE Webinars
- Organizing podium sessions, poster sessions, and workshops for T&DI’s flagship conference, ICTD and other specialty conferences
- Facilitating peer-reviewed journal papers, special issues, and conference proceedings.
- Supporting ASCE national initiatives (eg. ASCE Report card, SEI 2050 Challenge)
- Conducting technical research and developing white papers (eg. changing freight activity)
- Developing educational modules for use in academic and professional development settings (Eg. Sustainable Transportation Seminars, Introduction to Freight)
